This project, implemented in partnership with two reliable construction companies, consists of 884 flats and 11 commercial units in 15 blocks with 14 floors. In the project, which was built on a plot of 20 thousand 485 square meters, 2 + 1 apartments have a size of 72 to 83 square meters.

The project, which has been implemented in the privileged area of Kartal, in the Esentepe District, is being built as a giant complex that includes everything from shopping areas to the cultural center.

In the life park, where many activities will take place within the project, there is an open-air cinema for summer evenings and an open-air fireplace for warm conversations with your neighbors in winter evenings.

The project, which is 3 minutes away from the TEM and E-5 highway connections, will provide an advantage to the residents in terms of transportation with its proximity to the Anatolian Palace of Justice, Lütfü Kırdar City Hospital, university and shopping centers.
